WEB FUNDAMENTALS PROJECT
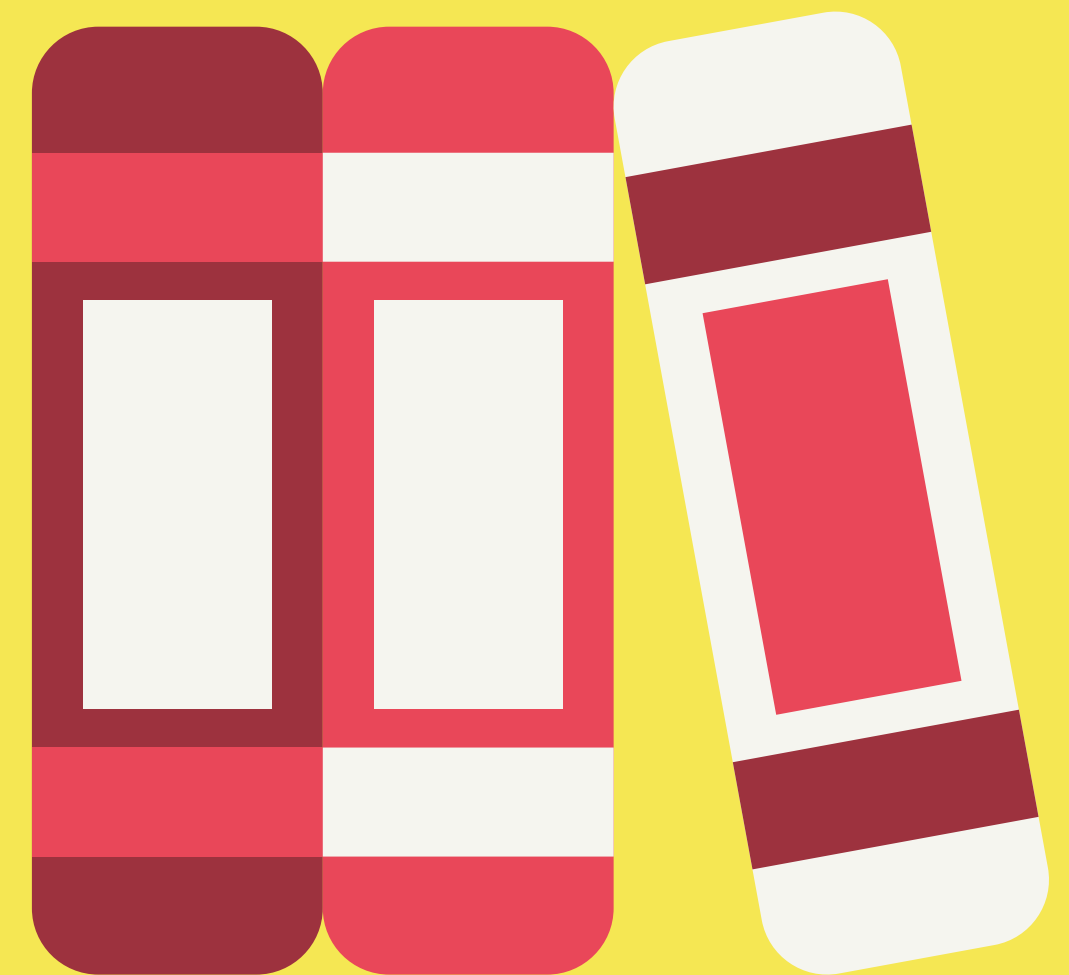

BENNARI MOHAMED

HOW DOES THE WEB WORKS?

THE BROWSER SENDS AN HTTP REQUEST MESSAGE TO THE SERVER, ASKING IT TO SEND A COPY OF THE WEBSITE TO THE CLIENT. THIS MESSAGE, AND ALL OTHER DATA SENT BETWEEN THE CLIENT AND THE SERVER, IS SENT ACROSS YOUR INTERNET CONNECTION USING TCP/IP.

WHAT'S THE ROLE OF A WEB DEVELOPER ?

A web developer is responsible for programming the code that "tells" a website how to function.
A developer builds a website from the bottom up, which means designing it in such a way that end users have no difficulty navigating the site.
